MyEasyFarm enrichs its Collaborative platform for Cooperatives and Contractors

MyEasyFarm, the AgTech Cloud platform for Data aggregation and transfer with Ag machines, enrichs its Collaborative capabilities for Cooperatives and Contractors.

The collaborative version of the MyEasyFarm platform allows 2 or more users to collaborate in real time and exchange Ag data, with a secured and controlled access driven by the farmer.

This allows Cooperative advisors to prepare on behalf of farmer users their fields, prescription maps and any advises and digitally made them available to each farmer.

Farmers keeps control of his data and can choice to share part of his agronomic data with his cooperative (Yield maps, agricultural cycles, ...).

This also allows fields and tasks digital transfers (to be completed, outcomes) between farmers and Contractors, smoothing their relationships and data exchanges.
